**On-line Technical Webinar**

**12:00 (noon) to 1:00 pm**

## ***The New OBC Subsection 5.10.4 'Other Fenestration Assemblies': Why it changes your practice***

The 2015 NBCC and the January 2020 OBC revision introduced a new category of defined products and assemblies in Division B, Part 5 'Environmental Separation'. Subsection 5.10.4 'Other Fenestration Assemblies' addresses window wall, curtain wall, storefront, and glazed architectural structures, all of which fall outside of the North American Fenestration Standard, AAMA/WDMA/CSA 101/I.S.2/A440 (aka NAFS), but are not otherwise dealt with by standards recognized by Canadian building codes. It defines structural and environmental loads and test methods and performance levels for heat transfer, air leakage and water penetration control. This presentation will offer a summary of the new requirements, identify how they depart from approaches commonly used previously, and give background information to help designers and builders understand intents and limitations of this important Code change.

**SPEAKER: Anik Teasdale-St. Hilaire, P.Eng., PhD** is a Façade Specialist and Project Manager in Morrison Hershfield's Façade Engineering Team. Anik has worked on a variety of projects throughout North America, including design and construction of new low, medium and high-rise residential buildings, institutional, commercial and residential, recreational and monumental buildings. She has also conducted building envelope condition assessments, glazing, sealant and roof failure investigations, building envelope rehabilitation projects, and; hygrothermal simulations of building envelope assemblies. Anik has a solid foundation in the fundamentals of building science and building envelope, having completed a B.Eng. and a Ph.D. in Building Engineering. Her background and over 14 years of practical experience has served Anik well in helping clients resolving challenges on a daily basis.
