

Building Envelope Council Ottawa Region

Lunch & Learn Technical Seminar

Wednesday, February 18, 2026
noon to 3 PM

Sala San Marco, 215 Preston Street

Initial Announcement

Mix of Topics:

- ***Common Roofing Challenges & Solutions***
- ***Insulated Concrete Forms: Technology and Performance***

Presented, and sponsored, by Tremco

This session presents two topics requested by members but not covered by BECOR in a long time.

Presentation No. 1: Roofing Challenges & Solutions

- By Meagan Kikuta, M. Eng., B. Arch. Sci., LEED AP, RRO

This presentation highlights common roofing challenges and practical solutions, focusing on constructability, climate, occupied buildings, site limitations, and budget realities. Attendees will gain insight into making informed system selections that reduce risk and extend roof service life.

Included topics:

- Difficult Details: the most common source of roof failures
- Winter Roofing Considerations
- Roof Restoration vs. Replacement
- Inverted Roof Replacement Challenges
- Odour, VOC, and Noise in Occupied Buildings
- Challenging Site Conditions
- Solutions for Limited Budgets
- Parapet Design and Performance
