

Call for Technical Presentations

While most of our presentations are arranged by the BECOR Committee, we know our program is at its strongest and most diverse when our members actively contribute their expertise.

To ensure a robust finish to our spring schedule, we are officially opening a Featured Spotlight for May 2026. We are seeking a dynamic presenter to lead our May Webinar or Lunch & Learn session, and we want to hear from you.

This is an excellent opportunity to share technical innovations, case studies, and building science research with a professional, engaged audience across the construction community.

What our members want to hear:

Following our recent member survey, we are specifically looking for presentations focused on:

- Building retrofit & low-carbon energy
- Resilience and future-proofing
- Off-site construction & prefabrication
- Water management and window performance

Presentation Guidelines:

- Timing: May 2026 (Webinar or Lunch & Learn) Date TBD
- Duration: 45–60 minutes (including Q&A)
- Content: Practical, insightful, and technical (not product promotion)

How to Participate:

Whether you have a completed case study to share, a topic you'd like to see covered, or a guest speaker to recommend, we want your input. We particularly encourage those of you who expressed interest in our recent survey to take this opportunity to step forward!

Please reach out to Steve Laviolette (slaviolette@bpa.ca), Tony Colantonio (alsomi@bell.net), or Brock Conley (brock.conley@nrcan-rncan.gc.ca) to discuss your ideas for the May slot. We look forward to showcasing the innovation happening within our own membership this May.
